

Can I start my own *Little Free Project?*

Little Free Projects

Adding a Little Free Project to your community whether you are a home owner, community league, church, business or non-profit is a great way to address food security, literacy and clothing needs at the ground level and to engage your community. Every little bit helps.

All you need is:

- **A willingness to help**
- **A little elbow grease and supplies to build a unit**
- **A group of neighbors to help keep the unit filled**

Go to www.littlefreeprojects.ca to see more on how you can register and start your own project
